

## OIML Certificate of Conformity

: DM3610-....

**OIML Member State** 

The Netherlands

Number R129/2000-NL1-13.01 Project number 13200217 Page 1 of 2

Issuing authority NMi Certin B.V.

Person responsible: C. Oosterman

Applicant Datalogic Automation Srl

Via Lavino n. 265 Monte San Pietro

40050 Italy

Identification of the

certified type

Type

A Multi-Dimensional Measuring instrument

Characteristics See next page

This Certificate attests the conformity of the above identified Type (represented by the sample(s) identified in the OIML Test Report) with the requirements of the following Recommendation of the International Organization of Legal Metrology (OIML):

**OIML R129** - Edition 2000 (E)

This Certificate relates only to the metrological and technical characteristics of the type of measuring instrument covered by the relevant OIML International Recommendation above-identified. This Certificate does not bestow any form of legal international approval.

Important note: Apart from the mention of the Certificate's reference number and the name of the OIML Member State in which the Certificate was issued, partial quotation of the Certificate and of the associated OIML Test Report(s) is not permitted, although either may be reproduced in full.

Issuing Authority NMi Certin B.V., OIML Issuing Authority NL1

6 August 2013

C. Oosterman Head Certification Board

NMi Certin B.V. Hugo de Grootplein 1 3314 EG Dordrecht the Netherlands T +31 78 6332332 certin@nmi.nl www.nmi.nl This document is issued under the provision that no liability is accepted and that the applicant shall indemnify third-party liability.

The notification of NMi Certin B.V. as Issuing Authority can be verified at www.oiml.org

Parties concerned can lodge objection against this decision, within six weeks after the date of submission, to the general manager of NMi (see www.nmi.nl).

## OIML Certificate of Conformity

**OIML Member State** The Netherlands

Number R129/2000-NL1-13.01 Project number 13200217 Page 2 of 2

The conformity was established by the results of tests and examinations provided in the associated OIML Test Report(s):

- No. NMi-13200217-01 dated 6 August 2013 that includes 64 pages.

## Characteristics of the multi-dimensional measuring instrument

| Suitability for measuring objects*)                               | Objects that are rectangular, opaque, and have regular surfaces  |                                  |                             |                            |
|---|--|----------------------------------|-----------------------------|----------------------------|
| Determination of dimensions of objects during automatic operation | dynamically  |                                  |                             |                            |
| Type of package flow  | Instrument is capable of measuring single objects or multiple objects simultaneously in the measurement area |                                  |                             |                            |
| Max   | L  |                                  | W                           | Н                          |
|   | Max <sub>L</sub> ≤ 2500 mm   | 1                                | $Max_W \le 1200 \text{ mm}$ | $Max_H \le 900 \text{ mm}$ |
| Min   | Min <sub>L</sub> ≥ 50 mm   |                                  | Min <sub>w</sub> ≥ 50 mm    | Min <sub>H</sub> ≥ 50 mm   |
| Scale interval  | $d_L \ge 5 \text{ mm}$   |                                  | $d_w \ge 5 \text{ mm}$      | $d_H \ge 5 \text{ mm}$     |
| Maximum number of partial measuring ranges                        | 1  |                                  |                             |                            |
| Maximum belt speed  | V <sub>max</sub> ≤ 3,15 m/s  |                                  |                             |                            |
| Temperature range   | -10 °C / +50 °C  |                                  |                             |                            |
| Environment classes   | M2 / E1  |                                  |                             |                            |
| Power supply voltage  | 22,5 – 26,5 V DC   |                                  |                             |                            |
| Software identification   | MD5 hashes   |                                  |                             |                            |
|   | DSP software   | 9769FD1C96438C5AB910F725545FFDB3 |                             |                            |
|   | FPGA software  | 61A92F0F152949924F17152E063A9236 |                             |                            |
|   | LFT library  | 940                              | 92F384948235EB4E70          | E30667D8991                |

<sup>\*)</sup> The smallest rectangular box that fully encloses the object is determined.

The above-mentioned limitations of use shall be clearly marked on the markings plate in a visible place to the operator.

The software identification can be shown as follows:

- Upon start-up of the instrument (it is displayed on the (optional) remote display), or;
- The system runs a web server through which the software identification can be accessed. From the main screen press the following sequence:
  - 'Modify Settings' -> 'Configuration'.
