of Legal Metrology**

## **1 Explanatory note**

Once a Declaration of Mutual Confidence (DoMC) is signed, Issuing Participants shall thereafter issue only OIML MAA Certificates for the corresponding category of instrument.

Several Issuing Participants have requested authorization to issue OIML MAA Certificates for applications received before a DoMC is signed.

This document defines the requirements for issuing OIML MAA Certificates in this case.

## **2 Requirements**

Evaluation and testing may be performed for an application received before an original DoMC is recorded by the BIML, provided that the requirements in 2.1 and 2.2 below are fulfilled; however the OIML MAA Evaluation Report and associated OIML MAA Certificate cannot be issued until the original DoMC is recorded by the BIML.

**2.1** Application was received and evaluation and testing were performed after the CPR Meeting which led to a proposal to accept the potential Issuing Participant.

This means that:

- Assessment of Testing Laboratory was conducted according to ISO/IEC 17025 either under the accreditation process or under the peer assessment process before the application was received by the Issuing Participant;
- Assessment Report has been evaluated by the CPR before the application was received by the Issuing Participant.

**2.2** The CPR has formulated a proposal to accept the relevant Issuing Participant without any reservations.

The above-mentioned requirements also apply to new potential Issuing Participants in a revised DoMC.
