29 June 2005

Note for CIML Members and OIML Corresponding Members

Subject: OIML Leaflet and Posters

Dear Colleagues,

During the CIML Meeting and the International Metrology Congress, copies of the new general leaflet on the OIML that the Bureau produced for this event were distributed to you. You probably also had the opportunity to see the posters that were displayed on the OIML stand at the Congress exhibition (four posters in English and four in French). PDF files of the leaflet/posters may be downloaded from the OIML web site (<http://www.oiml.org/lyon>) and the stand is also shown in a photo (<http://www.oiml.org/lyon/photos.html>).

As we proposed at the CIML Meeting, we are pleased to inform you that we can have extra copies of these leaflets printed and sent to each Member State and Corresponding Member so that you can use them for any national event to promote legal metrology. Please let us know how many you wish to receive, in English or French (or both).

We may also have the posters printed and sent to you (one set maximum per country, one language), in English or French. Please also let us know whether you wish to receive them and in which language.

For any country interested in having leaflets or posters printed in your own national language, please contact the BIML and we can assist you in contacting our printer, however please note that the BIML is unable to bear the cost of leaflets/posters in any language other than English or French.

Please send us your requests **before 15 September 2005**.

Best regards,

J.F. Magana
BIML Director
