

**Note to CIML Members**

**Subject: CIML online approval: New OIML Draft Recommendation  
*Compressed gaseous fuel measuring systems for vehicles***

Dear Colleagues,

OIML TC 8/SC 7 *Gas metering* was responsible for drafting a new OIML Recommendation *Compressed gaseous fuel measuring systems for vehicles* under project p2.

Despite the fact that the requirement related to the ratio of “yes” votes among OIML TC 8/SC 7 Members was not fulfilled (please refer to the TC 8/SC 7 report and to the additional BIML report), there is no prospect of obtaining wider acceptance by introducing further amendments.

In addition, considering the fact that a proposal to merge TC 8/SC 7 and TC 8/SC 8 *Gas meters* into one Subcommittee will be submitted for approval at the next CIML Meeting and that neither Belgium nor France will be able to take over the Secretariat of this new Subcommittee, the BIML suggested registering the document as a Draft Recommendation to be submitted for direct CIML online approval, as decided at the 41st CIML Meeting.

To this end you are kindly requested to post your comments (if any) and vote on this Draft Recommendation via the Members’ page of the OIML web site **at the latest by 2 July 2007**.

In order to be directly approved online, according to OIML B 1 *OIML Convention* at least two-thirds of CIML Members shall cast votes and no negative votes shall be cast. In the event that these conditions are *not* fulfilled, the Draft Recommendation will be submitted for regular approval by the CIML at its 42nd Meeting in Shanghai this October.

Please do not hesitate to contact us if you require any additional information or assistance in voting.

Yours faithfully,

**Jean-François Magaña**  
*Director, BIML*
