

BIML 08 No. 307/WK-cp

2008.05.14

### Note to CIML Members

**Subject: Circulation of document JCGM 104  
(Introduction to the GUM and associated documents)**

Dear Colleagues,

The OIML is a member of the JCGM, the Joint Committee for Guides in Metrology.

The document JCGM 104 is being circulated to JCGM member organizations for approval and editorial comments. The document (“Evaluation of measurement data - An introduction to the “Guide to the expression of uncertainty in measurement” and related documents) is contained in a zip file together with JCGM document 101 (Supplement 1 to the GUM), to which it hyperlinked.

The OIML is publishing JCGM documents as OIML Guides, which do not require formal CIML approval. However, the document is hereby circulated to CIML Members and to the members of OIML TC 3/SC 5 for information and review.

Any editorial comments should be sent to the BIML for my attention before 15 July 2008, using the form included in the zip file.

Kind regards,

**Willem Kool**
