**Subject: CIML preliminary online ballot – DR revision of OIML R 46
*Electrical energy meters – Part 3: Test report format***

Dear colleagues,

The revision of OIML R 46 *Electrical energy meters – Part 1: Metrological and technical requirements* and *Part 2: Metrological controls and performance tests*, was approved at the 47th CIML Meeting in Bucharest last October and was sanctioned by the 14th Conference.

To complete the revision of R 46, OIML TC 12 has developed the test report format (R 46 *Electrical energy meters – Part 3: Test report format*). The latest committee draft for this part of the publication was approved unanimously by all twelve members of the technical committee that cast a vote.

In accordance with paragraph 6.5.2 of the *Directives for OIML technical work* (OIML B 6-1:2012), the DR for R 46-3 is now submitted to the CIML for preliminary online ballot.

You are requested to cast your vote and submit any comments by the deadline of **12 April 2013**.

Best regards,

Willem KOOL
BIML Assistant Director
