## METROLOGY 2011

HAVANA, CUBA.

## INVITATION

The National Metrology Research Institute is pleased to invite you to the 8th **International Symposium “Metrology 2011”**, to be held on May 18 thru 20 in the Conference Center of Havana as an expression of the stronger links between Cuban metrologists and their international counterparts. **Metrology 2011** will provide an excellent framework for exchange among researchers, technologists and, in general, specialists on measurement in order to share updated knowledge and results through scientific discussion on Metrology, a science of unquestionable importance to develop research, production and services in any country.

**Metrology 2011** will make it possible to exchange experiences on a wide range of subjects, including Metrology and Health; Pharmaceutical Industry and Biotechnology; Agriculture, Energy and the Environment; as well as a number of topics related to Legal Metrology, such as road safety, prepacked goods, scientific metrology, management systems in metrology, development of human resources, and some innovations in international metrology.

Pre-conference training courses on measurement uncertainty and volume measurements have been designed.

We will be awaiting you in the spring of 2011.
